Editor Nick Fenton has dozens of credits to his name, but it was the uncharted territory of "A Private War" (in theaters now) that drew him to the Rosamund Pike-starring drama. Fenton spoke with Backstage about the film's real-life parallels, the enormous responsibility that comes with being a project's first audience, and what he wishes all actors knew about performing on-camera. What does an editor actually do? On a very simple level, we receive all the material, all the footage and picture from the shoot, and we try to make sense of it. We try to make the most clear, emotional, compelling s Nick Price's films include Because of Winn-Dixie, The Three Investigators and the Secret of Skeleton Island, Amy Winehouse: The Final Goodbye, The Land Before Time XII: The Great Day of the Flyers...
