Peoples and Empires: A Short History of European Migration, Exploration, and Conquest, from Greece to the Present (Modern Library Chronicles). (Written by one of the world's foremost historians of huma...) The author strives to portray various currents of learned debate circling in Spain, Britain and France as these countries built and exploited their American colonies and finally lost control over them. Comparisons to the Roman Empire were particularly prominent among the authors discussed in the first half of the book, while those closer to the end had come to consider commercial exchange among more or less self-governing units more preferable than bare domination. Theories of Empire, 1450-1800. Edited by DAVID ARMITAGE. An Expanding World: The European Impact on World History, 1450-1800, Vol. 20. Brookfield, Vt.: Ashgate/Variorum, 1998. The contrasts Pagden renders are most striking between Spain and Britain, with France usually portrayed as more kin to the latter. The other, farther-reaching contention, prominent in the book's second half, is that lessons from Europe's first empires significantly informed subsequent imperial ventures in Asia, Africa, and the Pacific, chiefly by instructing what an empire should not be. Pagden is more or less convincing in both endeavors, yet his parameters and focus, however defensible as a meaningful field for analysis, come with consequences, as juxtaposition to the Armitage volume Ideologies of Empire in Britain, France and Spain (1995), Peoples and Empires (2001), La Ilustración y sus enemigos (2002), Worlds at War, The 2500 year struggle between East and West (2008), and, as editor, The Idea of Europe from Antiquity to the European Union (2002). All of which have been translated into several European and Asian languages. Lords of All the World: Ideologies of Empire in Spain, Britain, and France, c. 1500-c. 1800. New Haven, CT: Yale University Press, 1995. E-mail Citation »». An influential work arguing that European Atlantic ideologies were fundamentally informed by medieval perceptions of Christian universal supremacy and classical theories of empire. The Spanish focused on the ideology of conquest and subjugation, the English on mundane settlement, the French on theatrical acts and native consent, the Portuguese on astronomical and scientific knowledge, and the Dutch on maps and chorographical descriptions. back to top.
