OECD Economics Department Working Papers. The Political Economy of Climate Change Mitigation Policies. OECD Economics Department Working Papers. Working papers from the Economics Department of the OECD that cover the full range of the Department's work including the economic situation, policy analysis and projections; fiscal policy, public expenditure and taxation; and structural issues including ageing, growth and productivity, migration, environment, human capital, housing, trade and investment, labour markets, regulatory reform, competition, health, and other issues. The views expressed in Climate change must be stopped. But who will do the stopping? Who, in other words, could be the political subject of an anticapitalist climate revolution? I am convinced this social agent could be, and indeed must be, the global working class. Yet to play this role, the working class must develop an emancipatory ecological class consciousness. The OMCJ campaign thus epitomizes both the challenges and opportunities for organized labor engendered by the economic and ecological crises. But without a doubt, a red-green coalition and an ecosocialist alternative in South Africa represents an alternative to just-transition orthodoxy – a truly radical labor politics in the age of climate change. On Labor's Terms.

We also consider labor unions, firms, and government as different players and predict the outcome of a given proposal involving weaker regulations in the labor sector under different economic contexts: the level of inflation, the degree of openness of the economy, the initial level of unemployment, etc. We conclude that reforms of the kind considered here will always be opposed by the labor unions and that they will be able to block the new legislation as long as unemployed, currently employed, and adaptive workers do not fully perceive the benefits of the new legislation and as long as some t 35 Cold Climate for Unions Political privatization, deregulation, free trade, restrictive labour legislation/regulation, government union busting Economic trade liberalization, outsourcing, offshoring, work reorganization, technological change, growth in precarious employment Social rise of new right, decline in public goods, social solidarity. 36 the best way to predict the future is to create IT. By mid-2019 unemployment and poverty had risen. Researchers at two Argentine universities estimate that 35 percent of the population is living in poverty, up from the official government rate of 27.3 percent in the first half of 2018.Â Why is Argentina perpetually subject to crises? The country of 43.4 million people has a literacy rate of over 98 percent, enormous natural resources, a vibrant export-oriented agricultural sector and a diversified industrial base.Â Argentina has experienced long-term economic growth, but it has been sluggish.
