Romantic poetry is the poetry of the Romantic era, an artistic, literary, musical and intellectual movement that originated in Europe toward the end of the 18th century. It involved a reaction against prevailing Enlightenment ideas of the 18th century, and lasted from 1800 to 1850, approximately. In early-19th-century England, the poet William Wordsworth defined his and Samuel Taylor Coleridge's innovative poetry in his Preface to *Lyrical Ballads* (1798). Romantic poetry has been one of the most enduring, best loved, most widely read and most frequently studied genres for two centuries and remains no less so today. This Companion offers a comprehensive overview and interpretation of the poetry of the period in its literary and historical contexts. This book argues that Romantic-era writers used the figure of the minstrel to imagine authorship as a social, responsive enterprise unlike the solitary process portrayed by Romantic myths of the lone genius. Simpson highlights the centrality of the minstrel to many important literary developments from the Romantic era through to the 1840s.

The Romantic Movement was mainly a poetic revolution. Romanticism was an international movement, not just confined to England, but no writer of that time called himself a "Romantic." His earlier poems are easy to understand, full of light and a child-like simplicity, full of the innocence of the spirit and the beauty of wonderful imagery. But his later poems, especially the poems in his prophetic books are mystical and very difficult to understand. There are marvelous flashes of imagery throwing light on deep truths, but they can also contain some very complex mythology which is very hard to understand. 86.
