However, the United Nations is also quietly finding ways to capitalize on satellite technology through its peacemaking, peacekeeping, and peacebuilding missions. As we argue in a new International Peace Institute report—aiming to complement the work of the Expert Panel on Technology and Innovation in UN Peacekeeping and the Secretary-General's High-level Independent Panel on Peace Operations—UN peacekeepers are actively harnessing satellite imagery and PEACEKEEPING SATELLITES: The Case for International Surveillance and Verification. A. walter dorn (1987). Alfoldi, T.T. and Ryerson, R.A., "Satellite Imagery Interpretation: Suggestions for Laboratory Design", COSPAR Technique Manual Series, Manual #5, Canada Centre for Remote Sensing, Ottawa, issued May 1976, 19 pp. Anselmo, L., Bertolli, B. & Farinella, P., "Security in Space", Proc. 33rd Pugwash Conference, Venice, Italy, 1983, pp. 105-111.

This book examines the possibilities for the use of satellite imagery in support of UN peacekeeping operations, and also to protect the national security of Canada. Experts in the field discuss the needs of peacekeeping operations, the requirements for the use of such imagery and the capabilities for providing it. The organizational, political and other issues which arise from the use of such imagery are also given careful consideration. Reviews. Globalstar Europe Satellite Services announced that two European Union (EU) peacekeeping organizations have deployed the SafeFleet telematics fleet management solution, incorporating Globalstar's SmartOne device. An EUMM truck on patrol. Photo: EUMM. Globalstar Europe Satellite Services announced that two European Union (EU) peacekeeping organizations have deployed the SafeFleet telematics fleet management solution, incorporating Globalstar's SmartOne device. However, the United Nations is also quietly finding ways to capitalize on satellite technology through its peacemaking, peacekeeping, and peacebuilding missions. As we argue in a new International Peace Institute report "aiming to complement the work of the Expert Panel on Technology and Innovation in UN Peacekeeping and the Secretary-General's High-level Independent Panel on Peace Operations" UN peacekeepers are actively harnessing satellite imagery and
