Publisher: Arrow books

Edition:

Book Size: 300mm x 240mm

Pages: 0

Volumes: 0

Condition: Fair

Jacket Condition:

Binding: Soft cover

Description: Large staple marks to edges of about twenty pages. In Masterpieces of Erotic Photography, twelve of the first contemporary artists in the field have been chosen to contribute to a single theme. The photographs have been carefully selected to reveal that which is quintessential and most distinctive in each man's vision. Some of the work has been seen before. A good part of it is new or as yet unpublished. A few of the photographs have already become famous as examples of the genre. The photographs are presented individually, each chapter offering a separate study and exploring a different facet of eroticism. They are at once personal statements and pieces of a total mosaic. These are images of women and sexuality as seen through man's eyes and they express what men hold to be erotic in the female form.

This book is a very important collection of information providing both an analysis of the many things in our culture that promote and support sexual assault, as well as a blueprint for ending sexual violence. It is one of the few books that focus on clear, direct, and achievable ways to change our rape culture. This remarkable book should be read by anyone who is concerned about the individual and societal effects of sexual violence. Men don't let the title scare you. Carrying a book with the word rape on the cover takes a lot of courage, but not as much as a woman has to muster to go to the washeteria alone at night.
